GAS TERMS FORM

TO: Gas customers with meters at the property line

FROM: City of Walker Gas Department

The Department of Transportation has required the City of Walker Utility Department to inform each customer of the following:

- The City of Walker does not maintain the customers piping system.
- If the customer's buried piping is not maintained, it may be subject to a potential hazard of corrosion or leakage.
- Buried gas piping should be periodically inspected for leaks. If piping is metallic, it should be inspected periodically for corrosion. If any unsafe condition is discovered, it should be repaired.
- When excavating near a buried gas piping, the piping should be located in advance. Call LA One Call at 811 or 1-800-272-3020. The excavation should be done by hand.
- Repairs are the responsibility of the customer. The City of Walker can assist in locating customer piping.

We recommend gas meters be placed at your home so the City of Walker can maintain the problems of leakage and corrosion. The City of Walker can assist you in replacing your gas line if you desire.

If your customer piping needs replacing, you have options.

Please call us at (225) 664-3123 for assistance.

Regards,

Larry Williams
